Sub-Second Web Architecture & Code Diff

How we shaved a client's homepage load time from 3.8 seconds down to 0.4 seconds and doubled their inbound bookings in 14 days. Includes exact code diffs and edge prefetching patterns.

⚡ VERIFIED PRODUCTION STACK | 💬 LEAD TRIGGER: "SPEED" | 🚀 VELOCITY: 10X LEVERAGE | 🔒 ZERO OPEN PORTS

80ms	0.4s	-85%	+100%
EDGE CACHE RESPONSE	FULL HYDRATION TIME	JAVASCRIPT PAYLOAD	INBOUND BOOKING RATE

⚡ 1. Responsive AVIF Media

IMAGE ARCHITECTURE

- Native Picture Elements: Use responsive with modern AVIF type sources.
- Zero Layout Shifts: Fixed aspect-ratio containers prevent layout jumps.
- Automatic Compression: WebP fallback for legacy browsers with zero manual overhead.

🚀 2. Hover Edge Prefetching

NEXT-PAGE PREFETCH

- Hover Preload: Fetch next-page HTML the instant user hovers over a CTA button.
- Speculative Navigation: Browser initiates connection 200ms before user clicks.
- Instant Page Transitions: Zero perceived loading time on internal funnel routes.

📦 3. Critical CSS Inlining

RENDER BLOCKING

- Inline Above-the-Fold: Deliver critical CSS directly inside the initial HTML payload.
- Async Secondary Styles: Load non-critical components asynchronously.
- Zero External CSS Requests: First paint occurs in first TCP roundtrip.

🔒 4. Edge Cache Rules

CLOUDFLARE CDN

- Cache-Control Headers: 'public, max-age=31536000, immutable' on hashed assets.
- Tiered Cache Network: Keep cached files hot across 300+ global edge datacenters.
- Stale-While-Revalidate: Instant responses while edge updates quietly in background.

📋 4-Phase Implementation Pipeline

PHASE 01	PHASE 02	PHASE 03	PHASE 04
Audit Diff	**Refactor Media**	**Edge Prefetch**	**Deliverable**
Identify render-blocking CSS and bloated JavaScript bundles.	Implement responsive AVIF tags with preloading.	Wire hover speculative prefetching on navigation links.	Lock sub-500ms First Contentful Paint globally.

bash — agy-dev-env — speed-blueprint

LIVE TERMINAL

```
// 1. Responsive AVIF image element with zero layout shift
<picture>
<source type="image/avif" srcset="/hero.avif" />
<img src="/hero.webp" width="1200" height="630" fetchpriority="high" alt="Hero" />
</picture>
// 2. Speculative hover prefetch on conversion buttons
<a href="/book" rel="prefetch" onmouseenter="preloadRoute('/book')">Book Call</a>
```

⚡ ENGINEERING CONSULTATION & DEPLOYMENT

Ready to Build Something Special Together?

We partner with forward-thinking founders, CTOs, and serious builders to architect sovereign, high-margin software systems. Whether launching a production MVP in 72 hours, deploying autonomous agent swarms, or migrating off expensive SaaS subscriptions—we deliver production-grade results.

⚡

72-Hour Rapid MVP Sprints

From raw specification to live production in 3 days. Sub-second Next.js / Vite client, FastAPI / SQLite microservice, Supabase auth, and Stripe monetization.

SPEED TO MARKET

🤖

Autonomous Multi-Agent Swarms

Custom CLI agent swarms tailored to your company's workflows. Autonomous code generation, automated test execution, and continuous documentation in Git worktrees.

10X COGNITIVE LEVERAGE

🔒

Sovereign Cloud Infrastructure

Replace $20,000/yr per-seat SaaS bills with private dedicated hardware, WireGuard encrypted mesh networks, and zero-open-port Cloudflare tunnels.
